COMPREHENSIVE MOBILITY MANAGEMENT IN A SINGLE SOLUTION

MobilSentry™ is the world's first enterprise mobility platform to deliver, in one portal, enhanced data management combined with full mobile expense management. Our award-winning platform provides visibility to apps and websites visited along with real-time device controls and alerts, which expand opportunities for companies to streamline mobility processes, improve accuracy, and reduce costs.
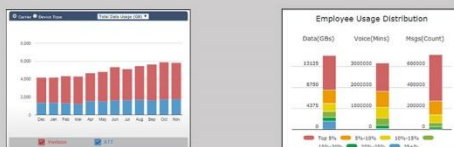

Understand where all your devices are, who is accountable, and how they are being used. Contextualize mobility data and connect it to people and processes, in order to make better business decisions. Eliminate waste and inefficiencies while gaining control over employee mobile data usage and rising mobile costs.

MOBILE SPEND OPTIMIZATION

Ensure your organization is paying the lowest possible price with monthly optimization algorithms. Eliminate carrier overage charges and minimize pool costs with cycle-end adjustments accomplished in real-time.

REPORTING & ANALYTICS

Interactive dashboards transform large and complex datasets into decision-making insights through the use of powerful analytics and interactive graphical displays.

INVOICE MANAGEMENT

MobilSentry™ integrates raw invoice data with HR, accounting and organization information increasing timeliness and accuracy with monthly expense and cost allocation processing.
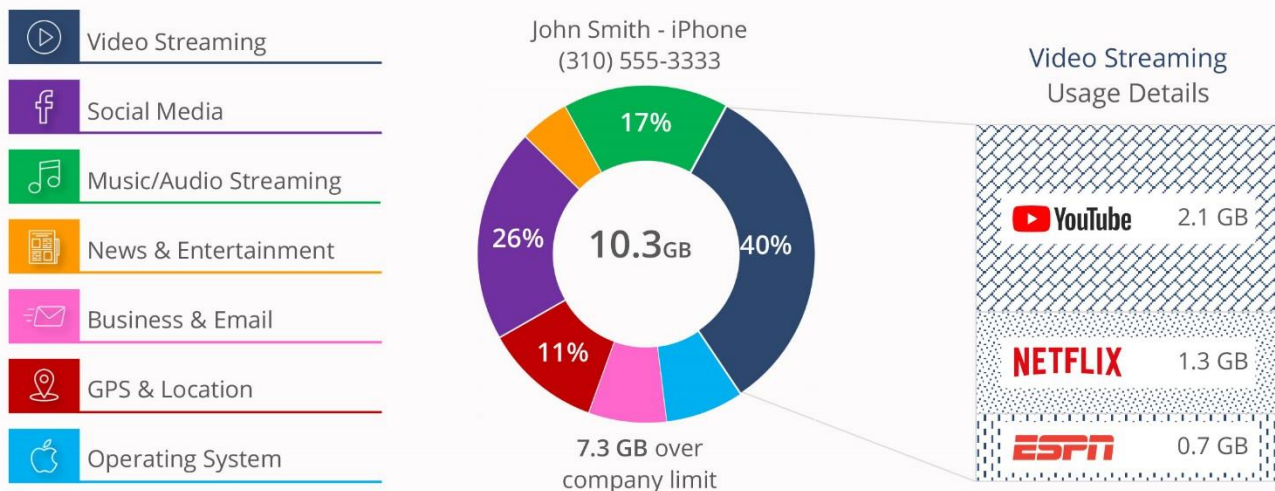

USAGE & POLICY CONTROL

Enforce mobile data use policy by revealing, at the click of a button, unacceptable usage patterns on monthly identified top users. Controlled data usage directly translates into savings.

TRUE VISIBILITY INTO YOUR ORGANIZATION'S MOBILE DATA USAGE

To understand and control employee mobile data usage, MobilSentry™ Real-Time Manager is the most advanced solution in the market today. Gain complete visibility into your mobility, from how employees are actually using their mobile devices, to who has what and where it is. Easily deploy across all your organization's devices - no software install or mobile app download required!

UNIQUE INSIGHTS

Visibility Well Beyond Standard Invoice Report

Non-business usage is fueling the rapid growth of mobile traffic, comprising as much as 85% of total usage. Carriers only provide limited details and are unable to show how devices are actually being used. View real-time ranking of your company's power users; the most popular apps and websites visited and an aggregate of overall data usage

REAL-TIME ALERTS

Proactive Notification Yields Results

Educate and improve employee awareness with mid-cycle alerts, tips and notifications. Customize mobile usage policies and enable automatic notifications in real-time to end users and administrative staff on unbilled data usage. Empower employees with information that encourages prudent mobile usage behavior.

2X - 5X ROI

UNPRECEDENTED CONTROLS

Selectively Apply Data Limitations

Enforce company policy compliance through restrictions of unapproved usage. Reduce non-work distractions with policies at individual and group levels. Establish more predictable company data usage and eliminate overages by setting data usage caps.

USAGE/INVOICE HARMONIZATION

Translates GBs into Dollars

Accurately calibrates real-time data collection in context of invoice period bill cycles, pool levels and carrier rates insuring selected actions produce positive cost savings. When usage cost is accurately correlated with specific employee actions, better decisions are made.
