MobilSense Makes CIO Mobility 2014 List

Agoura Hills, February 21, 2014 – The February issue of CIOReview has unveiled its CIO Mobility 2014 Award winners, which includes [MobilSense Technologies](#) as one of its *20 Most Promising Mobility Solution Providers* highlighted for 2014. This represents the second consecutive CIOReview recognition for MobilSense, which was previously honored as one of CR Tech20's *Most Promising Enterprise Mobility Companies* in 2013.

"We are flattered by this latest recognition by CIOReview," said Dave Stevens, CEO of MobilSense Technologies. "The Mobility Solutions marketplace is rapidly expanding and attracting the most talented innovators. To be selected among the most promising of this dynamically evolving market segment is a testament to our ability to adapt and innovate at an accelerating pace."

The CIOReview selection process for CIO Mobility 2014 included a distinguished panel comprised of CEOs, CIOs, VCs, industry analysts, and the editorial board of CIOReview. From a broader list of candidates, this panel identified the 20 companies deemed to be at the forefront of tackling enterprise mobility challenges. The CIO Mobility 2014 list can be viewed at:

Today's businesses face a proliferation of mobile devices, which complicates the task of maintaining control over cost and usage. By building on a foundation of Automation, Analytics and Flexibility, [MobilSentry™](#) by MobilSense identifies ways to [minimize wireless carrier costs](#) as well as methods to enforce usage policy through intuitive [reporting and alerting](#) to management on usage patterns across

all corporate mobile devices. “Because our wireless management solution is the most highly automated in the industry, we are able to deliver solutions that reduce manual work efforts well beyond what our competition provides. Our customers are able to manage their wireless devices in a more timely and accurate way at a fraction of the headcount required prior to adopting our mobility solution”, added Dave Stevens.

About MobilSense Technologies, Inc.

MobilSense Technologies Inc, based in Agoura Hills, CA, was founded in 2001 to deliver a premier wireless management solution. Focused on serving companies with enterprise wireless management needs, MobilSense combines vision, technology and experience to deliver a fully automated solution.
